## April 23-26, 2012 ITPX/NCUG

### Daily Agenda

**You are able to click on any Plenary Session description or this line to see a full list of session descriptions**

Monday, April 23 <sup>rd</sup>	
8:00am to 5:30pm	Registration Open (outside Eldorado)
9:00am to 4:00pm	<div style="display: flex; justify-content: space-between;"> <div style="width: 60%;"> <p style="background-color: yellow; display: inline-block; padding: 2px;"><b>IPv6 –TRA Certificate Issued</b></p> <p>IPv4 has been used in public and private networks for over 25 years But is straining to keep abreast with the size of networks and the broader range of new service requirements. IPv6 has been designed to specifically address these requirements and is moving into the mainstream via widespread development across products and growing network deployments. Discover the new capabilities of IPv6, from new address formats and types to enhanced QoS and Security capabilities. With the growth of wireless access technologies, mobility is a key capability for IP. Learn how IPv6 supports this important area. The challenges and alternative solutions for migrating from IPv4 to IPv6 are also discussed.</p> <p>(Note: attendees are on their own for lunch)</p> </div> <div style="width: 35%; text-align: center;"> <p>Please click here for full size image Workbook</p>  </div> </div>
