

# INTERNATIONAL TELECOMMUNICATION PROFESSIONALS EXCHANGE

'WHERE VOICE & DATA CONVERGE'

## MISSION STATEMENT

The International Telecommunication Professionals Exchange is an international end users' educational forum providing a unique users' group environment focusing on innovative and emerging hosted/managed and standalone voice and data network solutions.

## PURPOSE

The ITPX is a not-for-profit organization, administered by end users whose primary focus is education through the Annual Conference and Trade Show. ITPX brings together, through the Annual Conference and Trade Show, an intimate, strategic, cohesive community comprised of decision makers, end users, influencers, planners, and implementers. We offer awareness of new and existing products, services, and solutions, opportunities for networking and needs assessment supported by the industry's leading telecommunication service providers, manufacturers, vendors and subject matter experts.

## BENEFITS

- Provides a global forum to educate, develop, and inform members in all areas of telecommunications with specific emphasis on hosted/managed and standalone network solutions (i.e. Hosted Centrex IP, IP PBX, IP Telephony, Legacy Centrex and Multi Protocol Layered Switching-MPLS).
- Provides dedicated time to meet with service providers, manufacturers, and vendors offering solutions, products, and services in an intimate Trade Show setting.
- Promotes the mutual exchange of information, ideas, and experiences amongst a community of members with shared interests.
- Learn how to use next generation hosted/managed and standalone VoIP solutions, messaging, contact center, telemanagement, wireless, legacy Centrex, and other telecommunication services to the fullest advantage through networking with peers and attending educational sessions at the annual conference.
- Influence the provision and development of telecommunication services and express your opinions and concerns through open dialogue, panel discussions and relationships with end users, switch manufacturers, service providers, and vendors.
- Educational opportunities through access to current information on products, solutions, enabling technologies, white papers, past presentations, and live Subject Matter Experts via the annual conference and the ITPX and affiliated websites.

## **GOAL**

The ITPX provides educational opportunities that cover all possible telecommunication solutions. We realize that in today's complex Telecommunications Marketplace, there are now a variety of ways in which services and equipment can be combined to provide the *absolute best* telecommunication solution. Our end goal is not only to provide you with information that will allow you to incorporate the absolute best solution(s) into your employer's and/or customer's enterprise, but to also ensure that you too can become the *absolute best* telecommunications professional.

The ITPX is committed to technology growth and bringing new and evolving technology and information about multiple solution opportunities to the Annual Conference and Trade show.

## **ANNUAL CONFERENCE**

This annual educational conference brings together decision makers, end user influencers, implementers, manufacturers, service providers, vendors, consultants and other industry experts. Opportunities exist to network with Telecommunication Industry Professionals; learn about the latest telecommunication solutions/developments through breakout and plenary sessions and to view innovative and leading edge technology in the Exhibits area.

The ITPX conference offers a cost effective learning experience. As a not-for-profit organization, the ITPX is able to keep conference registration fees reasonable.

### **Who should attend?**

- Telecommunication and Network Directors, Managers, Supervisors, Analysts
- Consultants
- Call Center Managers, Analysts
- End User Customers
- Service Provider Employees

### **Who should exhibit?**

- Central Office Service and Equipment Providers
- VoIP Service and Equipment Providers
- IP PBX Manufacturers and Providers
- Wireless Service and Equipment Providers
- Manufacturers and Vendors of Telephony or Data products
- Manufacturers and Vendors of Telemanagement, Contact Center, and Messaging Solutions

## **MEMBERS**

The ITPX has international members from the continental United States, Canada, Mexico, Europe and Japan. Membership is complimentary and open to all end users of telephony services/equipment and all providers, manufacturers, vendors and consultants of telephony related service and equipment. The ITPX offers two (2) levels of membership: End User and Industry Professional.

**End User Members** are Telecommunication Professionals (voice and data) who represent companies from both the public and private sectors. End users can be employees of companies that provide telecommunication services or equipment on the condition their participation is solely end user related.

**Industry Professional Members** are professionals who represent companies that provide, manufacture and/or consult on telecommunication related services and equipment.

## **SPONSORSHIP OPPORTUNITIES**

The ITPX offers sponsorship opportunities to companies that provide and/or manufacture telecommunication related services and equipment. Sponsorship opportunities exist to provide vendors an active, integrated way to participate with the ITPX end-user membership community while providing recognition, conference visibility and advertising opportunities to our major sponsors. The ITPX offers three (3) levels of sponsorship: Silver, Gold and Platinum.
